EXPERIENCE

Software Developer

May 2021 – present

SAP

Dublin, Ireland

- Designed and delivered REST APIs for data import and export, for 1,000s of confirmed large enterprise customers
- Extended a cloud product to support 49 languages, enabling expansion across international markets
- Developed backend features in Java, also working across Python, TypeScript, SQL and React
- Built and maintained unit, acceptance and end-to-end test suites, developing deep knowledge of system behaviour and edge cases across multiple services
- Collaborated cross-functionally on technical delivery within an enterprise-scale agile environment

Integration Engineer

November 2019 — May 2021

SAP

Galway, Ireland

- Scripted, designed and tested enterprise integration workflows on a cloud platform using Java, Python and REST
- Configured and validated 100+ integration connections (SOAP, HTTPS, SFTP, EBICS, Swift), supporting a platform serving 800+ financial institutions and 100s of large enterprise customers
- Diagnosed and resolved network and protocol-level issues in complex enterprise integration environments

Web Design Intern

August 2019 — September 2019

Launchpad, University of Galway

Galway, Ireland

- Built the Launchpad website (HTML, CSS, JavaScript, PHP and WordPress) and trained the team on CMS

Support Associate with Spanish & French

October 2016 — September 2018

SAP

Galway, Ireland

- Wrote automation scripts that reduced chat response time by 400-4000%, directly improving team output
- Coached 8 teammates, trained 50+ colleagues, resolved technical issues and managed ticket queues

SKILLS

Technical: Java, Spring Boot, REST APIs, microservices, SQL, Git, Python, TypeScript, Node.js
